

[Messages guaranteed... in writing.]

The Omninote instant desk-to-desk message system improves office communication with printed and flash messages.

Even with advances such as email and voice mail, most employees still spend too much time on the phone. Employees are wasting time on hold, weaving through automated menus, and hanging up to try later when voice mail answers.

Omninote offers a simple solution to these problems by sending a concise message directly to the intended person.

Omninote messages get immediate attention because they print on the desk of the recipient. Because Omninote messages are time and date stamped and the sender and receiver each receive a printed copy, they receive a faster response than voice mail or email.

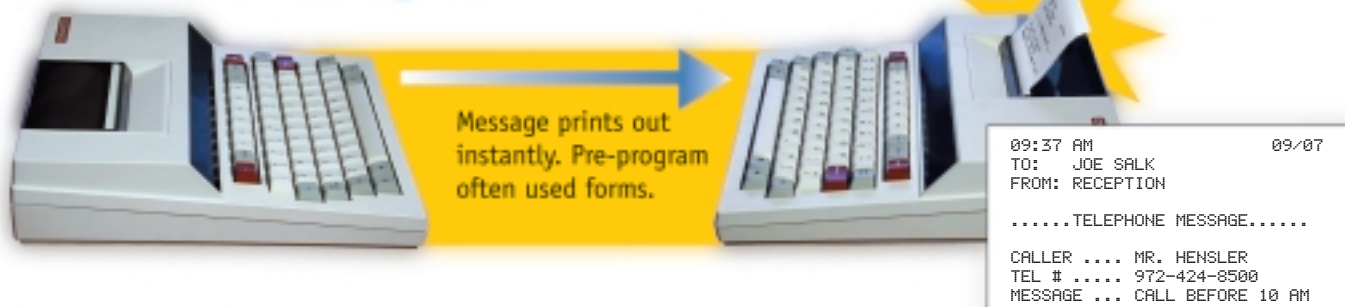

Omninote will make a dramatic improvement in your productivity by saving time, reducing verbal misunderstandings, speeding communication and eliminating telephone tag. The busier you are, the more you need Omninote!

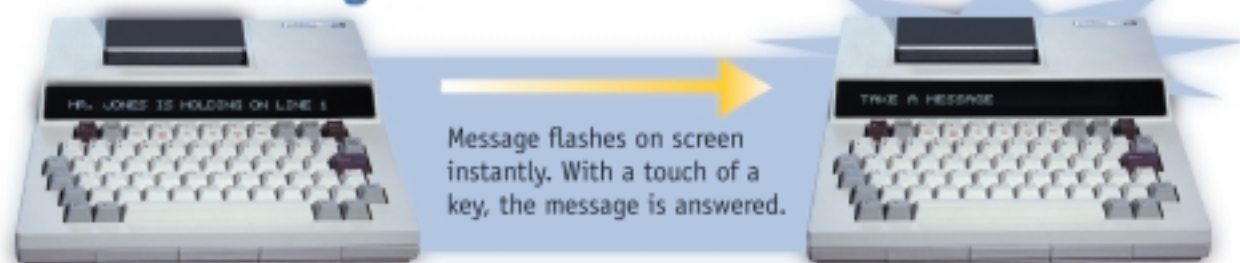

OMNINOTE

Instant message. Instant answer.

Printed Messages

Flash Messages

Popular Applications

Executive Assistant

- Call waiting notification
- Non-intrusive priority messages
- Appointment arrival/reminder
